Simon Dudley <Simon.Dudley@bedford.gov.uk>

Good afternoon Mrs Crawford,

I have been asked to look at the condition of Bushmead Road with regard to Structural Maintenance Works Programmes in the coming years.

You may be aware that the authority carries out surveys on the road network to assess its condition each year, and uses this information and visual inspections by an experienced engineer to determine works priorities.

Bushmead Road has been assessed, and although a small percentage of the road is beginning to deteriorate, the majority of the road falls into a category where work would be programmed with a medium term priority. As such we have provisionally identified this for patching repairs during 2020/21 and surface treatment in 2021/22.

The proposed schemes and future programme will be reviewed each Autumn, taking into account the up to date condition survey results, the available budget and the maintenance requirements for all roads within the borough. In the meantime safety inspections are carried out on a monthly basis, and any urgent works will be programmed to keep the road in a safe condition

Regards

Simon Dudley
